

PVS0153 Animal Assisted Intervention

3.0 credits

PhD course arranged by Graduate School for Veterinary Medicine and Animal Sciences (GS-VMAS)

Course date: March 19-23, 2018

Location: Skara

Lecturers: Aubrey Fine, Marie-Jose Slegers-Enders, Ng Zenithson, Jean-Loupe Raul

Content

The course will contain lectures from three international professors in the field of animal behaviour, veterinary medicine and human medicine or social science. They will attend during the whole week of the course and give start-up lectures, half a day lecture and end lecture. Some of the participants on the course will also give presentations about their research. We will also have practical work where we show how to use behavioural protocols, how to use heart rate recorders and how to collect saliva from dogs and horses. There will also be group discussions and one excursion. The PhD students are also expected to have prepared themselves before the course by reading three scientific papers. After the course they will have to write a report that will be examined by the course leaders.

Prerequisites

Admitted to a postgraduate program in animal science, biology, veterinary medicine, food science, nutrition, nursing, or related subjects, or to a residency program in veterinary science.
